

ThinkMH Pulse Tracker: Economics | June 2025

The Economics Pulse Tracker explores how people across Maharashtra perceive their current economic situation, the impact of global events such as the Iran–America conflict on livelihoods, investment behaviour, job opportunities, and confidence in economic growth.

The report analyses trends across socio-economic classes, age groups, professions, genders, and geographies. It highlights differences between rural and urban Maharashtra as well as metro and non-metro regions.

The tracker introduces the proprietary ****ARTH Index****, a comprehensive barometer of economic sentiment that will be tracked regularly.
