

ThinkMH Pulse Tracker: Governance | June 2025

The Governance Pulse Tracker examines citizens' perceptions of both the State and Central Governments. It evaluates public opinion on accessibility, transparency, accountability, corruption, and service delivery.

The report also studies the impact of direct benefit transfers and assesses the effectiveness of ten years of the JAM (Jan Dhan–Aadhaar–Mobile) framework.

ThinkMH has developed proprietary indices:

- * SEWA

- * SAAF

- * SACH

These combine into the overall ****SHASAN Index****, which serves as a long-term measure of governance performance.

The report includes regional comparisons across Maharashtra's six regions, along with age, gender, and demographic analyses.
